

Special Containment Procedures:

SCP-69420 is to be contained in a 5 m x 5 m x 5 m airtight titanium cube. Daily checks for any cracks or holes are mandatory. There is to be absolutely no video surveillance or optical tools of any kind inside SCP-69420's cell. SCP-69420's cell is equipped with GSC model 34572 motion detectors. Should the facility lose power, four backup generators are to immediately be rerouted to SCP-69420's containment cell.

Description:

SCP-69420 is a smelly creature measuring approximately 1.78 meters in height. Subject shows very little muscle mass, with preliminary analysis of body mass suggesting mild malnutrition. Skin is mostly devoid of pigmentation, with no sign of any body hair. He struck very high on the olfactometer due to its eroding sweatshirt it has had on since the dawn of time.

SCP-69420's dick can elongate to four (4) times the norm of an average human. Other body like features remain similar to an average human.

SCP-69420 is normally extremely docile, with pressure sensors inside its cell indicating it spends most of the day pacing by the picture of Josephine Bonnot and Elizabeth Brown on the wall. However, when someone views SCP-69420's dick, whether it be directly, via video recording, or even a photograph, it will enter a stage of considerable emotional distress. [DATA REDACTED] SCP-69420 will cover its dick when it goes rock hard with its hands and begin screaming, crying, and babbling incoherently.

Documented speeds have SCP-69420 going at a staggering 2 mph when he is normal and 200 mph when his dick is seen. [DATA REDACTED]

RECOVERY PROCEDURE

ALPHA:

This plan is for when things go out of proportion. [DATA REDACTED] There are three individual ways to get SCP-69420 back to its normal state. The ways each differ from most effective to least effective. The most effective way is to show the scp a picture of an underage girl that is under 14 years of age (100% effective). The second effective way is to show SCP-69420 images of Loli pornography (80% effective). The least effective way is to show the target images of the Overwatch hero Tracer engaging in acts of pornography (40% effective). Due to the possibility of a mass chain reaction, including breach of Foundation secrecy and large civilian loss of life, retrieval of the subject should be considered Alpha priority.

RELIEF PROCEDURE

OMEGA:

In the instance of RECOVERY PROCEDURE ALPHA's failure, the order for execution of RELIEF PROCEDURE OMEGA must be authorized by at least one of the 05 commands.[See instance 69420-A]

Procedure:

Once confirmed by 05 command, MTF unit Epsilon 11, MTF unit [REDACTED], and MTF Bowie 7 are to be dispatched to SCP-69420's location. Once contact is made, MTF Units are to engage SCP-69420 with live rounds. In the case of civilians coming into contact with SCP-69420, class A anesthetics are to be administered depending on the severity of trauma. In the case of a breach at site [REDACTED], MTF units are to carry out standard lock down procedure, and are authorized to order the detonation of the on site alpha warhead.

Creation:

Dr. [REDACTED] created the SCP-69420. He created it by inserting the following items into a canister and shaking it: 2 liquid ounces of chocolate, 4 liquid ounces of cum, a single strand of hair from Stuart the Minion, 1 piece of Nike Therma Men's Full-Zip Training Hoodie, [DATA REDACTED], 3 liquid ounces of Belle Delphine Bathwater, 1 pound of Jollof Rice, and special diamonds collected from a mining site in South Senegal.

Audendum 69420-A

On 7 May [REDACTED] there was an attack on the [REDACTED] in Tokyo, France. SCP-69420's target was a newborn baby, Josephine Bonnot. SCP-69420 seemed to have an attraction to Ms. Bonnot and dick-smacked anyone who got in its way. It kidnapped the child and took it to a cave outside of the city. It is unknown what he did, however the baby was not harmed. In fact, she was fed his nutritious milk, and comfortably tucked into a corner with a blanket made of unknown substances. The first squadron to arrive was MTF SQUADRON [REDACTED]. The agents all suffered blunt force trauma to the chest, most likely from the monster cock. He was also invulnerable to bullets, also because of his cock-blocker.

Audendum 69420-B

On 17 October [REDACTED], site [REDACTED] experienced a class 4 containment breach. Containment breached at 17:00 when SCP-69420 breached its containment cell, which then proceeded to violate and attack all nearby research personnel. SCP-69420 was then intercepted by MTF SQUADRON [REDACTED] [neutralized] and MTF UNIT BRAVO 11. SCP-69420 was contained at approximately [REDACTED] and was thereafter returned to its cell.

Casualties: Major Andrew [REDACTED] Sergeant Lewis [REDACTED] Captain Grenard [REDACTED]
Dr. Tony [REDACTED] Dr. Melisa [REDACTED], along with the entirety of MTF Unit [REDACTED].

Shortly after Incident 69420-B, Dr. Lenard [REDACTED] requested for SCP-69420 to be updated to Apollyon. [REQUEST GRANTED BY 05 COMMAND]
