

Special Containment Procedures:

If SCP-A11AH is ever able to be contained, he should be contained in nuclear blast proof 3m by 3m by 3m cube. At all times, there must be at least 10 facility guards watching him, Other containment procedures will be made if he is captured.

Description:

SCP-A11AH measures 0.82 meters in height but has a wingspan of 0.3m. Subject weighs less than 50 kilos but has 25 kilos of muscle mass and 15 kilos of penis mass. SCP-A11AH has dark white skin, but occasionally changes to red. It smells like a combination of nuclear chemicals and halal.

When SCP-A11AH is provoked, he screams his battle cry [allah lah lah lah lah] and detonates himself and creates an explosion with a radius of 10 meters. WARNING: THIS EXPLOSION IS LETHAL TO ANY LIVING ORGANISM. After detonating, he has a 3 minute recovery period, but will detonate again if touched. However, if SCP-A11AH gets wounded, using bullets or any sharp object, He detonates on the scale of an atomic warhead.

If SCP-A11AH sees any person eating any form of cooked pig, he enters his enraged mode. He charges at them at speeds over 4200 miles per hour. He then proceeds to snap their neck and melt their body with his bare hands. No one has ever survived his wrath.

If SCP-A11AH sees anyone eating from April 23 to May 23 during dawn to sunset, he also enters his enraged mode. He cries out "RAMADAN" and dashes at speeds of 4200mph towards the person. He proceeds to place unidentified grenades in their food and dash away. No one has survived it as the grenades detonate 0.3 seconds after they are placed.

[DATA REDACTED]

RECOVERY PROCEDURE

ALPHA:

SCP-A11AH only shows one weakness. When capturing, show him pictures of girls his age, such as Sophia Espy or Madison McDermott. He is extremely attracted to these types of girls, but is extremely scared to have any personal interaction with them. When shown a picture of a girl his age, he will scream at a force of about 300 decibels (enough to pop a human eardrums from about 70 miles away), begin to cry, and shrivel up into a ball and roll away. He can, however, roll very fast. He leaves a trail of halal meat juice behind him, unless it is ramadan mubarak and he is fasting. It is assumed that he hides in bathrooms in fast food places until he calms down.

RELIEF PROCEDURE

OMEGA:

Procedure: SCP-A11AH has a very special procedure in terms of his relief. Not many things are able to relieve SCP-A11AH. SCP-A11AH craves the touch of a warm woman, however the woman must not look at him. He also craves to be brought to the point of ejaculation by a woman, but she must not look or have any interaction with him. To replicate this, A special robot must be made. It must have the following characteristics to appeal to SCP-A11AH: Must be hyper-realistic, and act like a human, Must be his age or under. Must not have the face of anyone he knows, must have a constant, warm body temperature to appeal to one of SCP-A11AH's fantasies, must have some type of lubricant in it's mouth and genital area, and must be programmed to not look at SCP-A11AH or have any type of physical interaction with SCP-A11AH. If the procedure is successful, SCP-A11AH should be docile and should allow containment. However, if the process somehow fails, SCP-A11AH goes into a phase commonly known in the SCP world as "Ludicrous mode". He grows to about 4.1 meters, gains 139 kilograms of muscle, and his penis grows to about 7 times the size of the average person's. He will run through full cities, destroying buildings and causing property damage. He will forcefully kill any woman he sees. Consequences for failed relief procedures are substantial, and should be avoided at all costs.

Creation: SCP-A11AH was not created by man. After thorough research, we know he was created by the dawn of time. We have found a fossil of a female version [SCP-A11AH-F], most likely a family member, that happened to land on earth along with him. Even though SCP-A11AH can reproduce, he has not due to his fear of females. Even though he has not reproduced, he has slowly been evolving and creating more nuclear power.

Audendum A11AH-A

On 6 August 1945, the satellite picked up SCP-A11AH's nuclear signature in Hiroshima, Japan. MTF JAPAN SQUADRON ██████ engaged with the subject as fast as possible. They reported hearing SCP-A11AH groaning "halal." They were ordered to open fire on the subject to prevent casualties. However, after SCP-A11AH was hit by 103 bullets, he did not move. After a standoff for over 10 minutes, he detonated the size of an atomic bomb. [COVERED UP BY THE UNITED STATE'S ATOMIC BOMBING].

Casualties: Dr. Jannet ██████, Facility Guard Robin ██████, Captain Grenard ██████ II, MTF SQUADRONS ██████, ██████, and ██████, and 146.000 thousand people.
