

## Special Containment Procedures:

SCP-MY50N is to be contained in a 1.4m x 1.4m x 1.4m brick box, as SCP-MY50N, although it makes itself appear 5'7", is actually 4'1" in size. The brick box that imprisons SCP-MY50N is more than sufficient, as its physical strength will never penetrate any materials stronger than wood--even though it may convince one otherwise. SCP-MY50N's cell is powered by 7 generators. SCP-MY50N's cell is outfitted with 5 sound abaters to diminish SCP-MY50N's loud, odious voice and 4 motion-sensor equipped cameras.

## Description:

SCP-MY50N is an unpalatable, vile humanoid entity, roughly measuring 1.24 meters in height. Scans of SCP-MY50N's humanoid skeletal structure reveal that its brain is abnormally small, relative to normal human beings. Further scans reveal that SCP-MY50N's skull structure is rather dense. SCP-MY50N's skin pigmentation is normal, matching those of an average caucasian Italian boy.

SCP-MY50N's voice is one of its most repulsive features. Its *average* voice ranges from 130dB (the sound of a jet engine) to 140dB (the sound of fireworks). Any arguments resulting in SCP-MY50N's involvement will immediately end, as SCP-MY50N's voice shatters anyone near it--frequently reaching approximately 750.47dB.

SCP-MY50N enjoys outlandish, conservative-related conspiracies. His favorite conspiracies are [DATE REDACTED].

SCP-MY50N is extremely hostile. Any attempts at conversation with SCP-MY50N lead to [DATA REDACTED]; furthermore, approaching SCP-MY50N will result in gruesome [DATA REDACTED]. Documented instances relating to SCP-MY50N will show that SCP-MY50N gets extremely loud and hostile over something as trivial as a lack of buffalo wings.

Documented cases of hostile encounters with SCP-MY50N show that SCP-MY50N enjoys narrating its, self-attributed, eventual murdering of its victim, along with calling those who anger him terms relating to female genitalia. Despite numerous instances of this, SCP-MY50N has never killed anyone.

## RECOVERY PROCEDURE

### ALPHA:

For when an out-of-proportion situation occurs.

The quickest and most effective way of getting SCP-MY50N to its normal state, with ninety-seven percent (97%) efficiency, is to agree with whatever SCP-MY50N is spewing out. Another effective method, although being much longer, is to ignore SCP-MY50N. This method is not recommended as SCP-MY50N can blabber for up to 16 hours.

MTF unit Epsilon and MTF unit Epsilon-7 are to engage SCP-MY50N with tracker rounds, as SCP-MY50N may attempt to make a cowardly escape.
